### Tagline

I'm always ready to work with organization from where I can learn always a new skill new things and improve my work experience. I'm a hardworking and very sincere person and very much serious about my work

### Skills

HTML | CSS | Python | C/C++ | Javascript | Android Studio | React.js | NodeJs | MongoDB

### Projects

#### Coffe Shop - Android Application

- I designed user interfaces and page layouts using XML, focusing on simplicity for user-friendly interactions.
- I utilized Java for backend development, implementing logical functionalities and seamlessly connecting to Firebase for efficient data management
- Administrators have the capability to edit the available ingredients, including tea, coffee, sweets, and prizes.

Skills Developed: Android Studio, XML, Java, Firebase

#### Art Gallery-Ecommerce Website

- To sell handmade paintings.
- I created the website's look and feel using HTML and CSS, making it user-friendly. Behind the scenes, I used JavaScript and NodeJS for smooth communication. Plus, I added Stripe for secure online payments.
- User can buy a product by add to cart and buying option. Admin has power to change, add and delete any product, and check customer details through stripe.

Skills Developed: HTML, CSS, Javascript, NodeJs
